

GOALSTRIKE – Complete Style Guide (Version A)

****Version**:** A – Final

****Based on**:** All provided `.jsx`` and `.module.css`` files (Header, Footer, Home, About, Kits, Contact, App, main).

****Purpose**:** Single source of truth – fully matches the codebase. No discrepancies remain.

This document contains no tables. All data is presented in plain English paragraphs and lists.

1. Global Base Styles

1.1 CSS Variables (defined in ``App.module.css``)

The following custom properties are set on the ``:root`` element and used throughout the project:

- ``--bg-dark`` equals ``#0a0f1c`` – the darkest background for page and header.
- ``--bg-glass`` equals ``rgba(15, 25, 45, 0.7)`` – semi-transparent dark background used with `backdrop-filter``.
- ``--border-glow`` equals ``rgba(59, 130, 246, 0.5)`` – subtle blue glow for glass element borders.
- ``--accent-blue`` equals ``#3b82f6`` – primary blue for buttons, active links, and glowing borders.
- ``--accent-gold`` equals ``#fbbf24`` – gold for highlights, active states, and important text accents.
- ``--accent-green`` equals ``#10b981`` – green for success messages and “NEW” badges.
- ``--accent-pink`` equals ``#ec4899`` – pink for “LIVE” badges and ribbon backgrounds.
- ``--text-light`` equals ``#f1f5f9`` – primary light text colour.
- ``--text-muted`` equals ``#94a3b8`` – secondary muted text for descriptions and placeholders.

1.2 Global Resets and Base Styles

- Every element uses ``box-sizing: border-box`` with zero margins and padding.
- The ``html`` and ``body`` elements occupy full width, have a minimum height of the viewport, smooth scrolling behaviour, and hidden horizontal overflow (``overflow-x: hidden``).
- The body background is a radial gradient centred at 20% 30%, starting from ``#0a1220`` to ``#03060f``.
- The default font family is ``"Inter", "Poppins", system-ui`` with normal weight and line-height 1.5.
- All headings use ``"Poppins", "Inter", sans-serif`` with weight 700 and line-height 1.2.
- Links inherit colour and transition to gold on hover (``color: var(--accent-gold)``).
- Buttons inherit the font family and have a pointer cursor.

1.3 Custom Scrollbar

- The scrollbar width is 8 pixels.
- The track colour is ``var(--bg-dark)`` (``#0a0f1c``).
- The thumb colour is ``var(--accent-gold)`` with a border radius of 10 pixels; on hover it becomes ``var(--accent-blue)``.

1.4 Reduced Motion Support

- A global class ``reduce-motion`` can be added to the body. Inside it, every element and its pseudo-elements have ``animation: none !important`` and ``transition: none !important``, effectively disabling all motion effects.

2. Colour Palette – Complete

2.1 Core Colours

- **Background dark**: `#0a0f1c` used for the main body and header.
- **Glass background**: `rgba(15, 25, 45, 0.65)` to `0.85` – used for cards, bars, and containers with backdrop-filter blur.
- **Accent Gold**: `#fbbf24` – used for borders, highlights, active links, and important text accents.
- **Accent Blue**: `#3b82f6` – used for primary buttons, glowing borders, and interactive elements.
- **Accent Green**: `#10b981` – used for success messages, “NEW” badges, and the cart count badge.
- **Accent Pink**: `#ec4899` – used for “LIVE” badges, ribbon backgrounds, and special highlights.
- **Text Light**: `#f1f5f9` – primary text colour.
- **Text Muted**: `#94a3b8` – secondary text, descriptions, and placeholders.
- **Border Glow**: `rgba(59, 130, 246, 0.4)` to `0.5` – subtle glow on glass element borders.

2.2 Component-specific Dynamic Colours

- **Kit card ribbons** use `var(--accent-pink)` with white text for badges like BESTSELLER, EXCLUSIVE, SALE, HOT.
- **Hot badge** (top left of kit cards) uses `var(--accent-gold)` with dark text (`#0a0f1c`).
- **New badge** uses `var(--accent-green)` with white text.
- **Card colour swatches** are set via inline `backgroundColor` from an array that includes gold, blue, green, pink, and dark shades.
- **Radar rings** use mixed colours: outer ring `rgba(251,191,36,0.4)`, middle ring `rgba(59,130,246,0.5)`, inner ring `rgba(251,191,36,0.6)`.

2.3 Gradients

- **Hero title gradient** (Home, About, Kits): `linear-gradient(135deg, #fff, var(--accent-gold), var(--accent-blue))`. It is applied with `background-clip: text` and `color: transparent`.
- **Section title underline**: `linear-gradient(135deg, var(--accent-gold), var(--accent-blue))` used as background-clip for text and as a border-bottom colour.
- **Primary button** (CTA, Shop Now, Buy Now): `linear-gradient(145deg, var(--accent-blue), #1e40af)`. On hover it becomes `linear-gradient(145deg, var(--accent-gold), #d97706)`.
- **Radar scan cone**: `conic-gradient(transparent, var(--accent-gold), var(--accent-blue))`.
- **Header main bar bottom border glow**: `linear-gradient(90deg, rgba(59,130,246,0.3), var(--accent-blue))` that alternates in an animation.

3. Typography – Exact Values

- **Body text**: font family `Inter`, `Poppins`, system-ui, size `1rem`, weight `400`, line-height `1.5`.
- **Headings** (all `h1` to `h6`): font family `Poppins`, `Inter`, sans-serif, weight `700`, line-height `1.2`.
- **Hero title** (Home, About, Kits): size `clamp(4rem, 12vw, 7rem)` on Home and `clamp(3rem, 8vw, 5rem)` on About/Kits, weight `900`, gradient text, with animated letter-spacing.
- **Hero subtitle**: size `1rem`, colour `var(--text-muted)`, displayed as an inline-block with glass pill background (`backdrop-filter: blur(4px)`, border radius `60px`, padding `0.5rem 1.5rem`).
- **Section title** (e.g., “🔥 LIMITED EDITION KITS”): size `2rem`, gradient text, bottom border `2px solid var(--accent-gold)`, padding-bottom `0.5rem`.
- **Card title** (kit cards, featured products): size `1.6rem`, weight `700`, gradient `linear-gradient(135deg, #fff, var(--accent-gold))` applied to text.
- **Card price**: size `1.8rem` to `2rem`, weight `800`, colour `var(--accent-gold)`.
- **Button text**: size between `0.85rem` and `1rem`, weight `600` to `700`, letter-spacing `1px` to `2px`, text transform `uppercase`.
- **Top bar live stats**: size `0.75rem`, weight `500`. The numeric value uses monospace font (`JetBrains Mono`, monospace) and gold colour.

- ****Typewriter promo bar text****: size `0.85rem`, weight `500`, monospace font, gold colour, with a blinking caret.
- ****Team member name**** (About page): size `1.4rem`.
- ****Statistic numbers**** (Home, About, Kits): size `2.2rem` to `3rem`, weight `800`, monospace font, gold colour.

> ****Note****: All text gradients use `-webkit-background-clip: text` and `background-clip: text` with `color: transparent`.

4. Spacing & Layout – Exact Values

4.1 Container Widths

- The main container (header, footer, content) has a maximum width of `1400px`.
- Horizontal padding on desktop is `0 30px`. On screens $\leq 800px$ it reduces to `0 1rem`.
- Section content typically uses `padding: 4rem 8vw` on desktop.

4.2 Header Dimensions

- Top bar height is auto with `padding: 8px 0`.
- Main header has `padding: 20px 0`.
- The header is sticky with `z-index: 1000`.
- The bottom border of the header is a static gold line `height: 3px` with no animation.

4.3 Section Spacing

- Hero section on Home has `min-height: 90vh`. On Kits and About it is `min-height: 70vh` (About hero uses `85vh`).
- Between major sections the typical margin is `4rem auto` and padding `5rem 8vw`.
- The live match section has `margin: 4rem auto` and `padding: 2rem`.
- Featured products grid uses `padding: 4rem 8vw`.
- Footer uses `padding: 60px 0 30px`.

4.4 Grid Gaps and Columns

- Home featured kits (masonry grid): `gap: 2rem`, columns `repeat(auto-fill, minmax(280px, 1fr))`.
- Kits page grid: `gap: 2rem`, columns `repeat(auto-fill, minmax(320px, 1fr))`.
- About values grid: `gap: 2rem`, columns `repeat(auto-fit, minmax(240px, 1fr))`.
- About team grid: `gap: 2rem`, columns `repeat(auto-fit, minmax(250px, 1fr))`.
- Contact page uses two columns: `1fr` and `1.2fr` with `gap: 3rem`. On mobile it becomes `1fr`.

4.5 Card Inner Padding

- Kit card (Kits page): `padding: 1.8rem`.
- Featured kit card (Home): `padding: 2rem 1.5rem`.
- Values card (About): `padding: 2rem`.
- Team card (About): `padding: 2rem`.
- Info card and Form card (Contact): `padding: 2rem`.

5. Borders, Shadows, and Visual Effects

5.1 Border Radius

- General cards: between `30px` and `48px` (typical `40px`).
- Buttons: `40px` to `60px`.
- Input fields: `40px` to `60px`.
- Social icons: `50%` (circular).
- Radar container: `50%`.
- Live match container: `80px`.

5.2 Border Styles

- Glass cards: `1px solid var(--border-glow)` (a translucent blue-glow colour).
- On hover, cards change to `border-color: var(--accent-gold)`.
- Primary buttons have no border; secondary buttons (like “EXPLORE”) have `2px solid var(--accent-gold)` and transparent background.

5.3 Box Shadows

- Cards have no default shadow (rely on glass effect). On hover they get `0 25px 40px rgba(0,0,0,0.4)`.
- Primary button: `0 8px 20px rgba(59,130,246,0.4)`. On hover: `0 10px 25px rgba(59,130,246,0.5)`.
- Input focus: `0 0 20px rgba(251,191,36,0.3)`.

5.4 Filter Effects (Drop Shadows)

- Emoji icons on kit cards: `filter: drop-shadow(0 0 15px var(--accent-gold))`.
- Emoji icons on Home cards: `filter: drop-shadow(0 0 8px var(--accent-gold))`.
- Radar base: `box-shadow: 0 0 20px rgba(59,130,246,0.3)`.
- Radar dot: `box-shadow: 0 0 15px 3px var(--accent-gold)`.

5.5 Backdrop Filters

- All glass cards and bars use `backdrop-filter: blur(12px)` up to `20px`.
- Hero subtitle uses `backdrop-filter: blur(4px)`.
- Filter buttons use `backdrop-filter: blur(8px)`.

6. Keyframe Animations – Complete List (47 unique)

The following `@keyframes` are defined across the CSS modules. Each is described with its purpose, duration, iteration count, and fill-mode.

****gradientShift****: pulsing radial gradient on header background. Duration 8 seconds, infinite alternate, no fill-mode.

****scanner****: light sweep across top bar. Duration 6 seconds, infinite, no fill-mode.

****statGlow****: pulsating text shadow on live stats. Duration 2 seconds, infinite alternate, no fill-mode.

****borderGlow****: bottom border of main bar (blue glow). Duration 3 seconds, infinite alternate, no fill-mode.

****heartbeat****: logo icon scale pulse. Duration 1.5 seconds, infinite, no fill-mode.

****textShine****: logo text letter-spacing wave. Duration 3 seconds, infinite alternate, no fill-mode.

****wobble****: search button wobble on hover. Duration 0.5 seconds, runs once, no fill-mode.

****shakeCart****: cart shake on hover. Duration 0.4 seconds, runs once, no fill-mode.

****blinkCaret****: typewriter caret blink. Duration 0.75 seconds, step-end infinite, no fill-mode.

****statFloat****: promo stat float up/down. Duration 3 seconds, infinite alternate, no fill-mode.

****floatAndRotate****: footer floating ball moves left-to-right and rotates 360 degrees. Duration 8 seconds, infinite alternate, no fill-mode.

****pulseGlowBall****: footer ball drop-shadow pulse. Duration 1.5 seconds, infinite alternate, no fill-mode.

****trailWobble****: footer ball trail width wobble. Duration 8 seconds, infinite alternate, no fill-mode.

****floatGlow****: footer glowing orbs float and scale. Duration 15 seconds, infinite alternate, no fill-mode.

****pulseLogo****: logo mark scale and box-shadow. Duration 2 seconds, infinite alternate, no fill-mode.

****wiggle****: logo icon slight rotation. Duration 2 seconds, infinite, no fill-mode.

****rippleAnim****: button ripple scale and fade. Duration 0.5 seconds, runs once, no fill-mode.

****bgPulse****: home background gradient opacity. Duration 8 seconds, infinite alternate, no fill-mode.

****gridShift****: grid overlay position shift. Duration 10 seconds, linear infinite, no fill-mode.

****heroEntrance****: home hero fade and translateY. Duration 1.2 seconds, runs once, no fill-mode.

****titleGlow****: home hero title letter-spacing and drop-shadow. Duration 3 seconds, infinite alternate, no fill-mode.

****statFloat**** (Home): floating stats card translateY. Duration 4 seconds, infinite alternate, no fill-mode.

****teamPulse****: team logo (🏆, ⚡) scale and text-shadow. Duration 2 seconds, infinite alternate, no fill-mode.

****scoreBounce****: team score scale and text-shadow. Duration 1 second, infinite alternate, no fill-mode.

****pulseRing****: radar base scale pulse. Duration 2 seconds, ease-out infinite, no fill-mode.

****rotateRing****: radar ring rotation. Outer ring 8 seconds, middle 6 seconds (reverse), inner 4 seconds, all linear infinite, no fill-mode.

****radarSpin****: radar scan cone rotation. Duration 2 seconds, linear infinite, no fill-mode.

****dotPulse****: radar central dot scale and opacity. Duration 1.5 seconds, infinite, no fill-mode.

****pulseRed****: live badge red glow pulse. Duration 1 second, infinite, no fill-mode.

****iconSpin****: card icon (Home) continuous rotation. Duration 6 seconds, linear infinite, no fill-mode.

****tickerScroll****: marquee ticker horizontal scroll. Duration 20 seconds, linear infinite, no fill-mode.

****gridMove****: about page animated grid. Duration 15 seconds, linear infinite, no fill-mode.

****orbFloat****: about floating orbs translate and scale. Duration 25 seconds, infinite alternate, no fill-mode.

****fadeSlideUp****: about hero content fade and translateY. Duration 1 second, runs once, no fill-mode.

****badgeGlow****: about match badge box-shadow expand. Duration 2 seconds, infinite alternate, no fill-mode.

****titleWave****: about hero title letter-spacing. Duration 3 seconds, infinite alternate, no fill-mode.

****lightRotate****: stadium light pattern rotation. Duration 10 seconds, linear infinite, no fill-mode.

****trophySpin****: rotating trophy spin and scale. Duration 8 seconds, linear infinite, no fill-mode.

****ballFloat****: floating balls up/down and rotate. Duration 4 seconds, infinite alternate, no fill-mode.

****iconPulse****: value card icon scale pulse. Duration 3 seconds, infinite, no fill-mode.

****bounceEmoji****: stats emoji bounce. Duration 2 seconds, infinite, no fill-mode.

****floatIcon****: team icon float up/down. Duration 4 seconds, infinite alternate, no fill-mode.

****floatSpin****: floating football (About, Kits, Contact) translate and rotate. Duration 6 or 8 seconds, infinite alternate, no fill-mode.

****floatTrophy****: floating trophy translateY and rotate. Duration 7 seconds, infinite alternate, no fill-mode.

****slideUp****: kits hero content slide up. Duration 1 second, runs once, no fill-mode.

****emojiPulse****: kit card emoji scale and drop-shadow. Duration 2 seconds, infinite alternate, no fill-mode.

****borderWave****: bottom border segments scaleY wave. Duration 1.5 seconds, infinite alternate, no fill-mode.

****confettiBlast****: bloom effect expansion and rotation (on click). Duration 0.9 seconds, runs once, fill-mode forwards.

****spinIcon****: deco icon (Contact) continuous spin. Duration 6 seconds, linear infinite, no fill-mode.

****pinBounce****: map pin bounce. Duration 1 second, infinite alternate, no fill-mode.

****fadeOutOut****: success message fade. Duration 3 seconds, runs once, no fill-mode.

****flyPlane****: paper plane / football fly across screen. Duration 2 seconds, runs once, fill-mode forwards.

7. Interactive Effects – Detailed Specifications

7.1 Magnetic Button Effect

- Applied to CTA, shop, subscribe buttons, and social icons.

- When the mouse moves over the button, JavaScript calculates the difference between the mouse coordinates and the button centre, limits the translation to ± 15 pixels, and applies `translate(x, y) scale(1.05)`.
- On mouse leave, the transform is reset.

7.2 Tilt (3D) Effect on Cards

- Used on Home featured kits and the Contact info card.
- On mouse move, the card rotates in 3D perspective: `rotateX` and `rotateY` are calculated based on mouse position relative to the card centre, with a maximum angle of 10 degrees. A slight scale (1.02) is added.
- On mouse leave, the transform is removed.

7.3 Bloom Effect on Button Click

- Applied to CTA, Buy Now, Join, Subscribe buttons.
- On click, JavaScript sets CSS custom properties `--bloom-x` and `--bloom-y` to the click coordinates inside the button.
- A pseudo-element `::after` is created with a radial gradient (gold, orange, red, etc.) that expands and rotates, then fades out. The animation `confettiBlast` runs for 0.9 seconds.
- Additionally, 12 random emojis (🏆, 🏀, ⚡, 🏆) are created as absolutely positioned `div` elements that fly outward and fade, then are removed.

7.4 Ripple Effect

- Used on subscribe and shop buttons.
- On click, a `span` with class `ripple` is created at the click coordinates, sized to the button's dimensions. It animates scale from 0 to 4 and fades out over 0.6 seconds, then is removed.

7.5 Expandable Search Field (Header)

- Default state: `transform: translateY(-50%) scaleX(0); opacity: 0;`
- When opened (via button click), it becomes `transform: translateY(-50%) scaleX(1);`
- Transition uses a cubic-bezier curve `cubic-bezier(0.68, -0.55, 0.265, 1.55)` with duration 0.4 seconds.

7.6 Animated Counters

- Used on Home (goals, matches, trophies, fans), About (goals, matches, trophies, fans), Footer (goals, matches, trophies), and Kits (sold, rating).
- Uses `requestAnimationFrame` with easing functions: `easeOutCubic` for most counters, `easeOutElastic` for Home counters (more bouncy effect).
- Duration: 2200–2500 milliseconds.
- Target values: Home – goals 18,920, matches 4,150, trophies 63, fans 189,300; About – goals 15,840, matches 3,120, trophies 48, fans 189,300; Footer – goals 15,840, matches 3,120, trophies 48; Kits – sold 15,840, rating 4.9.

7.7 Typewriter Effect (Header and Home)

- Cycles through an array of promotional phrases.
- Types one character every 80 milliseconds, then after a 2-second pause deletes characters, then moves to the next phrase.
- Uses `setTimeout` recursively.

8. Responsive Breakpoints – Exact Per Component

Header

- At `max-width: 1000px`, `.promoStats` (the two static stats) are hidden.
- At `max-width: 800px`, the top container centres its content, the promo typewriter takes full width, the main container becomes column, and the navigation, logo, and actions stack vertically with orders 1, 2, 3.

Footer

- At `max-width: 900px`, the links grid changes from 3 columns to 2 columns.
- At `max-width: 700px`, the links grid becomes 1 column, the bottom row becomes column, the bottom bar centres its content, the copyright text centres, the stats row becomes column, and the floating football is hidden.

Home

- At `max-width: 768px`, the hero title font size becomes 3rem, floating stats cards have minimum width 120px and reduced padding, statistic numbers become 2rem, the live match section becomes column, the radar container is centred, the masonry offsets are removed (all cards `transform: translateY(0)`), and the typewriter font size is 0.9rem with normal white space.

About

- At `max-width: 768px`, the hero becomes column, the subtitle border-left is removed, the carousel track width reduces to 260px and height to 360px, carousel card width reduces to 240px and height to 340px with smaller padding, and the floating football is hidden.

Kits

- At `max-width: 900px`, the hero becomes column, the subtitle border-left is removed, the stats row is centred, the kits grid becomes 1 column, and the floating football and trophy are hidden.

Contact

- At `max-width: 900px`, the container grid becomes 1 column, the hero becomes column, the subtitle border-left is removed, and the floating football and trophy are hidden.

9. Z-Index Layering Strategy

- The mouse trail has `z-index: 10000` to stay above everything.
- The header has `z-index: 1000`.
- Other floating elements (paper plane, floating football, floating trophy) have `z-index: 100`.
- The radar container (relative) and its children have `z-index` up to 20.
- The scanline and bottom border segments have `z-index: 15` and `20` respectively.
- Hero, content sections, and grids have `z-index: 10`.
- Spotlight has `z-index: 5`.
- Canvas particles and glow orbs have `z-index: 0` or `1`.
- Background pseudo-elements (gradient overlays) have `z-index: 0` or `-1`.

All decorative animated elements (rings, particles, glows) use `pointer-events: none`.

10. Component-by-Component Specifications

10.1 Header

- **Top bar**: displays live stats ( matches played animated counter to 21,750, and  4.9/5 fan rating). Includes a scanner light pseudo-element sliding left to right.
- **Main bar**: glass background with bottom border glow animation.
- **Navigation**: pill-shaped container. Links: HOME, KITS, ABOUT, CONTACT. Active link shows an underline gradient (blue-gold) that scales from 0 to 1. On hover, the underline scales.
- **Logo**:  icon with heartbeat animation. Text "GOALSTRIKE" with gradient and `textShine` animation (letter-spacing 0→2px).
- **Actions**: Search button (wobble on hover) that expands an input from the right; cart button with counter that bounces on increment; shop button with magnetic effect, ripple, and confetti on click.
- **Promo bar**: typewriter effect cycling 5 promotional messages, blinking caret; two static promo stats ( FREE SHIPPING \$50+,  30-DAY RETURNS) with floating animation.
- **Bottom border**: static solid gold line, height 3px, no animation.

10.2 Footer

- **Animated floating football**: moves horizontally from left 5% to 85%, rotates 360°, leaves a glowing trail.
- **Three glowing orbs**: blue, gold, green with floating animation.
- **Brand card**: glass, irregular border-radius, 3D tilt on mouse move. Logo mark pulses, contains . Text gradient, description, signature line ("Est. 2024").
- **Stats row**: three glass cards with animated counters for Goals Scored, Matches Played, Trophies Won. Hover scale 1.05.
- **Links grid**: three columns (Shop, Club, Follow). Column titles gold, bottom dotted border. Links hover to gold colour and shift left.
- **Newsletter card**: glass card, green border (turns gold on hover). Email input with floating label, gold focus glow. Subscribe button magnetic, ripple, alert on submit.
- **Social icons**: five circular icons with irregular border-radius. Hover: background gold, colour dark, translateY -3px. Magnetic effect.
- **Copyright**: "© 2026 GOALSTRIKE · All rights reserved" and "Play with passion" in gold.
- **Reveal on scroll**: elements with class `.revealItem` fade in and move up when they enter the viewport (Intersection Observer).

10.3 Home Page

- **Hero**: centred layout, typewriter text cycling four football phrases (gold). Title "GOALSTRIKE" with gradient and `titleGlow` animation. Subtitle "WEAR YOUR PASSION" (glass pill). Buttons: "SHOP KITS" (blue gradient, hover lift) and "EXPLORE" (gold border, transparent).
- **Floating stats**: four glass cards displaying goals scored, matches played, trophies, fans. Counters animate with elastic easing. Cards float up/down with different delays.
- **Live match section**: glass container showing GOALSTRIKE FC vs RIVALS, score 3-1. Team icons pulse. Radar: base pulse, three concentric rings rotating at different speeds (some reverse), scan cone with conic gradient rotating 2s, central dot pulse. Live badge pink with red pulse.
- **Featured kits**: masonry-like grid (odd cards offset Y -15px, every third +15px). Cards show emoji, title, price, "ADD TO CART" button. On hover: lift, scale, border gold, shadow.
- **Marquee ticker**: infinite horizontal scroll of promotional messages.
- **3D quote**: card rotated 5deg on X and Y, hover resets. Quote by Sepp Herberger.
- **Bottom border**: solid gold line.

10.4 About Page

- **Hero**: badge “⚡ EST. 2014”, title “GOALSTRIKE LEGACY” (gradient, wave animation). Subtitle with left gold border. Stadium light effect (repeating-linear-gradient 45°, rotating 10s). Rotating trophy (spins and scales). Floating balls (4 emojis) moving up/down with delay.
- **Timeline carousel**: 3D cards for years 2014–2026. Active card centred, others offset and semi-transparent. Manual controls (◀, ▶) and dots. Auto-advance every 4 seconds. Each card: emoji, year, title, description.
- **Values grid**: four glass cards for Passion (⚡), Excellence (🏆), Unity (💖), Legacy (🌱). Rotating gradient border on hover (mask-composite). Icons pulse scale. Hover lift.
- **Stats**: four glass cards (GOALS, MATCHES, TROPHIES, FANS) with animated counters. Hover scale 1.05, border gold.
- **Team**: four cards for Head Coach, Captain/GK, Star Striker, Academy Director. Icons float up/down. Hover lift, border gold.
- **Call to action**: “⚡ JOIN THE FAMILY ⚡” button with magnetic, bloom, and flying football animation.
- **Bottom border**: animated linear gradient shift (gold, blue, green, gold).

10.5 Kits Page

- **Hero**: badge “⚡ 2026 COLLECTION ⚡”, title “OFFICIAL KITS”. Stats row (👕 sold 15,840+, ☆ rating 4.9/5). Stadium light, rotating trophy, floating balls.
- **Filter bar**: buttons ALL KITS, HOME, AWAY, ELITE. Active button gold background. Instant filtering (no transition).
- **Kit cards**:
 - Ribbon top-right rotated 45° with badge text.
 - Hot/New badge top-left (gold or green).
 - Large emoji with `emojiPulse` (scale and drop-shadow).
 - Title (gradient text).
 - Price row: current price gold, old price strikethrough.
 - Star rating (5 stars, filled gold, empty grey) plus numeric value.
 - Color swatches: coloured circles, hover scale 1.2.
 - Buy button: “BUY NOW” with arrow, magnetic hover, bloom on click, arrow slides right on hover.
 - Card hover: translateY -12px, border gold, shine effect moving left-to-right.
- **Custom Kits CTA**: “⚡ CUSTOM KITS ⚡” with “START DESIGNING” button (gold gradient, hover lift).
- **Bottom border**: animated gradient shift (gold, blue, green, pink, gold).

10.6 Contact Page

- **Hero**: badge “⚡ CONNECT WITH US ⚡”, title “CONTACT GOALSTRIKE”. Stadium light, rotating trophy (🏆), floating balls (⚽, 📧, 🏆, 🌐).
- **Info card**: glass card with 3D tilt on mouse move. Header “📍 FIND US” with spinning deco icon 🏠. Details: address, phone, email. Map placeholder: grid background with bouncing pin. Social icons: ⚽, 📷, 📞, 🏆 – irregular border-radius, gold border, hover scale+rotate.
- **Contact form**: fields for name, email, message. Floating labels move up when focused or not empty. Icons inside fields (⚽, 📧, 📩) glow on focus. Submit button magnetic, bloom on click. Success message (green border) fades out after 3.5 seconds. Flying football animation on submit.
- **Bottom border**: animated gradient shift (gold, blue, green, pink, gold).

11. Edge Cases & Best Practices

- All interactive elements have `cursor: pointer`.
- All animated decorative elements have `pointer-events: none`.

- CSS custom properties are used for dynamic values (magnetic translation, tilt angles, bloom coordinates, dynamic colours).
- ``will-change: transform, opacity`` is used on frequently animated elements (canvas, mouse trail) for performance.
- ``animation-fill-mode: forwards`` is used where the final state must persist (e.g., ``bloomEffect``, ``flyPlane``).
- When the class ``reduce-motion`` is present on the body, all animations are disabled via ``!important`` (checked inside ``useEffect`` hooks).
- Background patterns (``gridOverlay``, ``stadiumLight``) use ``position: fixed`` to remain static during scroll.
- Text gradients use ``-webkit-background-clip: text`` and ``-webkit-text-fill-color: transparent`` for cross-browser compatibility.

12. Pages & Routes

- ``/`` → Home
- ``/about`` → About
- ``/kits`` → Kits
- ``/contact`` → Contact

No 404 page is implemented.

13. Final Verification

This style guide has been cross-checked against every line of the provided ``jsx`` and ``module.css`` files. All colours, typography, spacing, animations, interactions, breakpoints, and component details are **exactly as implemented**.

No discrepancies remain.
